STATEMENT OF PURPOSE

A guided session building skills to inspire passionate staff to serve as donation resources for their hospital teams.

OBJECTIVES

- Understand the donor-recipient relationship following the flow from placement on waiting lists to allocation and acceptance of organs
- Recognize the donor management process for optimizing organ allocation prior to organ recovery
- Summarize the challenges faced for organ donation across the healthcare spectrum while supporting the donor families and honoring the gifts of donation, transplantation, and research
- Discern the pronouncement of brain death and requirements thereof

INTENDED AUDIENCE

Professionals involved in the donation and transplantation of organs & tissues including nurses, social workers, physicians, respiratory therapists, and others

WORKSHOP HIGHLIGHTS

- LifeShare Overview
- Family Support and Donation Conversations
- Brain Death vs DCD
- Organ Donor Management
- Kidney Management Wet Lab
- Q&A Panel
